Modular Hydroponic Systems OFF GRID Capability

Hydroponic farming systems accommodate high planting density and good yield. Sequenced planting schedules ensure continuous harvesting –aligned to contractual obligations

Hydroponics is a method of growing plants using mineral nutrient solutions, without soil. Terrestrial plants may be grown with their roots in the mineral nutrient solution only or in an inert medium, such as perlite, gravel, or mineral wool. Plant physiology researchers discovered in the 19th century that plants absorb essential mineral nutrients as inorganic ions in water. In natural conditions, soil acts as a mineral nutrient reservoir but the soil itself is not essential to plant growth. When the mineral nutrients in the soil dissolve in water, plant roots are able to absorb them. When the required mineral nutrients are introduced into a plant's water supply artificially, soil is no longer required for the plant to thrive. Almost any terrestrial plant will grow with hydroponics.

The two chief merits of the soilless cultivation of plants are, first, much higher crop yields, and secondly, the fact that hydroponics can be used in places where ordinary agriculture or gardening is impossible. Hydroponic systems utilise water treatment and filtration techniques to ensure ideal conditions for plant production are provided

Rural and Smart Village WiFi Hotspot Roll-out

YELLOM OAK COMMUNICATIONS

Methodology

- Hotspots will be rolled out in one square kilometre blocks (Mula blocks)
- Each block will be self sustaining and can be individually funded
- A block will not be geographically bound
- A marketing campaign will precede a hotspot initiation

Viability

- No competition
- Most sought after product taken to high dense area of demand with no existing supply
- Sustainable solution
- Reliable service provider

Y-KONNECT

4

TERESTRIAL LASTMILE NETWORKS

- Installation of WiFi hotspots in Smart Village and Sub-rural Townships
- Provide products and services including internet services at these hotspots
- Sell via voucher system

Institute for Balanced Development

Welcome

It is our aim to guide, support and equip every young person and his or her supporting structure to develop in a well-balanced member of society. We assess, test and monitor young individuals to discover their strengths, weaknesses, potential and threats. We introduce balanced development programs to avoid burnout.

Youth Development

Age Groups

1. Prebirth: Potential
2. Birth: Hope
3. Infancy (Ages 0-3): Vitality
4. Early Childhood (Ages 4-7): Playfulness Core Believe
5. Middle Childhood (Ages 8-10): Imagination Personality, interests talents Start developing
6. Late Childhood (Ages 10-12): Ingenuity Social Skills Coping with Life
7. Adolescence (Ages 13-19): Passion Biological development dominates Psychological dev
8. Early Adulthood (Ages 20-35): Enterprise
9. Midlife (Ages 35-50): Contemplation
10. Mature Adulthood (Ages 50-80): Benevolence
11. Late Adulthood (Age 80+): Wisdom
12. Death & Dying: Life
